

Logan Plan 2025: Thriving economy

shared vision, sustainable future

A dynamic, forward-thinking city

The City of Logan is strategically located between Brisbane and the Gold Coast, with easy access to important transport hubs and corridors. We have a young and diverse population who are ready to embrace opportunities. Our network of activity centres, natural assets, affordable land and well-connected educational institutions position our city for the jobs and prosperity that will shape our future.

Logan's economy is everyone's business, and we recognise this by including a "Thriving economy" as one of the five pillars of our new planning scheme, Logan Plan 2025.

What do you think?

Are we on the right track?

How do we support a thriving economy as our city grows?

What other opportunities are there for our economy?

Get involved

We'd love to know what you think about the **Thriving economy** pillar as part of Logan Plan 2025.

Key elements

Our focus on a thriving economy includes key elements to guide growth and development in our city. In developing our Logan Plan 2025, we value:

A regionally significant centre

We promote and support our business and industry, taking advantage of our strategic location near major transport corridors and opportunities in key locations, such as health services in Meadowbrook. We explore opportunities in emerging sectors and value the tourism potential of our city.

A self-contained city

We explore and embrace opportunities to create jobs in our city for our city, including a night-time economy, tourism and recreation, education and home-based businesses.

Protecting employment

We preserve land for industrial, tourism and other uses that will benefit our city and work to ensure the infrastructure, both hard and digital, needed to unlock key areas can be delivered.

Renewables for our future

We support opportunities for our city to leverage renewables like solar, resource recovery and a circular economy.

Together, we're shaping our city and our future.
